TITLE	A Guide for the Management of Special Education Programs. 3.0 Task Data Tables.
INSTITUTION	Santa Cruz County Superintendent of Schools, Calif.
PUB DATE	72
NOTE	76p.
EDRS PRICE	MF-$0.65 HC-$3.29
DESCRIPTORS	*Administration; Educational Accountability; Educational Programs; *Exceptional Child Research; Guidelines; *Handicapped Children; Staff Role; *Statistical Data; *Task Analysis; Task Performance; Time

ABSTRACT

The third document in an eight-part series on a task-based management system for special education programs presented field-gathered data (organized in the form of summary tables) on task time distribution, reported responsibility distribution, and suggested responsibility distribution for a wide range of tasks. Task time distribution charts identified the total time of all occurrences of a respective task during the sample period, the individual task's total time as compared to the total time recorded for all tasks, the number of times a task was reported to have occurred during the sample period, the average time for each occurrence of a task, median time for each occurrence of a task, the longest and shortest times required to complete a task during the study, and the frequency with which a task occurred per week. Data on reported task responsibility indicated which personnel positions were involved in the completion of various tasks and the percentage of time each task took of that position's total reported time. Data on suggested task responsibility showed what positions were agreed upon as being responsible for a given task. (For related information, see also EC 050 205, EC 050 206, and EC 050 208 through EC 050 212.) (GW)

3.1	Task Time Distribution	3-1
3.2	Reported Responsibility Distribution	3-25
3.3	Suggested Responsibility Distribution.	3-48

3.1 TASK TIME DISTRIBUTION

The information offered in this section is the result of coding, sorting, and summarizing task cards (Task Description Forms). The data is offered only as a guideline, and should not be taken as a standard. It is most applicable to tasks that occur at intervals throughout the school year rather than on a continuous basis. Not all of the tasks on the TBC are shown in this section because complete field data was not received. Data for each respective task can be obtained by reading across the page and should be interpreted as follows:

TASK # = the task identification number corresponding to the task number and description shown on the Task Base Composite.

TOTAL TIME = the total time (minutes) of all occurrences of the respective task during the sample period. For example, the sum of the reported time for all the occurrences of Task 1.10 was 51 minutes.

% ALL TASK TIME = the proportion (in percent) of the individual task's total time compared to the total time recorded for all tasks. Thus, for Task 1.11, the time of 82 minutes represents 0.06% of all the time recorded for all the tasks reported. This may help provide an indication of the time necessary for each task reported by field personnel.

CARDS = the number of times a task was reported to have occurred during the sample period. For example, Task 1.10 occurred 7 times (i.e., there were 7 task description cards collected) during the sample period for a total of 51 minutes.

MEAN TIME = the average time (in minutes) per occurrence of each task. For example, Task 2.20 occurred 19 times and averaged 66.6 minutes per occurrence. This statistic, used in conjunction with the median and range statistics, as well as with the administrator's personal program experience, can be used to determine the time per task occurrence for use with the Position Worksheet (Column 5).

MEDIAN TIME - 50% of the tasks took more than this time to occur and 50% took less. If the mean time and median time are very different, use the median time for Column 5 on the Position Worksheet. The median is a more representative statistic for a highly variable collection of figures.

HIGH TIME = the longest time it took to complete a task during the study. For example, the longest time it took to complete Task 1.10 was 21 minutes according to research. This number represents the high of the range of times recorded.

LOW TIME = the shortest amount of time it took to complete the task. The low and high represent the range of time it took to complete the task during the study.

AV. WK FREQ. = the frequency with which the task occurred per week. For example, Task 1.11 occurred on the average 0.9 times per week or about once per week. For tasks occurring at intervals, this frequency (number of occurrences per week) multiplied by the estimated time per occurrence will yield an estimate of time per week (in minutes) spent completing a task. Divide this figure by 60 to get the hours per week required to complete a particular task (for Column 7 on the Position Worksheet).

DONE

3.2 REPORTED TASK RESPONSIBILITY

This data is based upon a summary of the project field research. It shows for each of the positions identified, the percent of that position's total time spent on a given task. For example, Task 1.03 shows speech therapists spent 0.52% (about 1/2% or 12-15 minutes) of all their reported time on this particular task.

In some situations, more than one position worked on the same task. For example, with Task 2.20, the coordinator (COOR DNTR), psychologist (PSYC), speech therapist (SPCH THER), teacher (CERT TCHR), instructional aide (INST AIDE), and the audiometrist (AUDI MTRS) all worked on this same task, each for the respective percent of their time as shown.

The following is a list of the position abbreviations used at the top of the pages in this section:

DIR = Director
ASST DIR = Assistant Director
COOR DNTR = Coordinator
SEC = Secretary
PSYC = Psychologist
SPCH THER = Speech Therapist
NURS = Nurse
SOCL WRKR = Social Worker
HEAD TCHR = Head Teacher
CERT TCHR = Certificated Teacher
PRMT TCHR = Permit Teacher
INST AIDE = Instructional Aide
MNTC AIDE = Maintenance Aide
ITRT TCHR = Itinerant Teacher
AUDI MTRS = Audiometrist

This data shows the position that worked on various tasks and the percentage of time each task took of that position's total reported time. Reviewing this data may provide an indication of the varying responsibility of each position and the different percent of total time required by different positions to be spent on a task. Again, this data should function only as a guide.

DONE

3.3 SUGGESTED TASK RESPONSIBILITY

This data is similar to that shown in Section 3.2, except that it represents the field's interpretation of what should be. The data shows who (what position) was agreed upon as being responsible for a given task.

This data was gathered from a questionnaire (Probe 2) received from 120 field respondents. The positions identified on the questionnaire differ somewhat from those identified in Section 3.2. For example, the ADM (administrator) as shown in this section represents anyone in an administrative capacity; e.g., director, coordinator, etc.

The data shows the percent of respondents who assigned primary responsibility for completing the task (not just supervising its completion) to each respective position. For example, for Task 1.01, 78.6% of the respondents felt that the ADM (administrator) should be responsible for completing the task.

Note that some tasks require more than one position to participate in completion of the task; e.g., tasks such as attending meetings apply to numerous positions. This data was used to develop the suggested responsibility coding used in the bottom of most blocks on the TBC.

The data should be used only as a guide and, with the addition of the administrator's experience, to help define the positions necessary to operate a specific program.
